### WWF Green Trust Sabie River Water Stewardship Project Evaluation

#### 1. Purpose

Overall objective to document and review project performance against stated objectives. This will include an assessment of learning outcomes from the project and recommendations for a way forward (future projects).

#### 2. Objectives

- An analysis of the delivery of project objectives vs stated objectives.
- To understand any additional outcomes of the project that were outside of the initial project scope.

#### 3. Scope of Work

The Kruger to Canyons (K2C) NPC, in partnership with SANParks (South African National Parks), are presently managing a project in the Sabie River Catchment under the WWF-SA Nedbank Green Trust Project GT5650, which includes in its aims to:

- Revitalise four defunct smallholder irrigation schemes along the Sabie River immediately adjacent to the Kruger National Park (Goromani, Sabie River Farmers Association, Hoxani and Saringwa schemes) through communal organisation, support in enhanced farming and irrigation techniques, supply chain development and improved market access whilst ensuring that this is ultimately compatible with conservation objectives in a biodiversity economy (being based on agro-ecological principles).
- Incentivise catchment stewardship through the mid- and headwaters of the Sabie catchment. This is to ensure the water supply at a higher level of assurance to users downstream and therefore minimizing the pressure on water supply from Inyaka dam (the present status-quo being that this has a significant allocation for domestic use and augmentation for Sabie River environmental water requirements, with limited assurances for other uses).
- Promotion of water security at the catchment scale by ensuring that the Mpumalanga Drakensberg Strategic Water Source Area is well managed.

The project commenced in 2018 and ends in May 2021 with a requirement that a project evaluation is conducted .

#### 4. Analytical Approach

- 4.1 A review of all evidence of project progress, documentation, reports and other outputs
- 4.2 Interviews with project team and key stakeholders

## 5 Reference documentation

The following reference documentation should be considered:

- Project Progress Reports
- Project Deliverable Reports
- Meeting minutes inclusive of interactions with other initiatives

## 6 Deliverables

- Inception meeting
- Acceptance of framework
- Final Monitoring, Evaluation and Learning report

## 7 Requirements of the Service Provider

Proven record of experience and qualifications to do:

- Project Evaluation

## 8 Appointment

The successful service provider will be appointed during in March 2021. Report to be completed mid April-2021.

## 9 Submission of interest

A 3 page framework proposal (including the scope of work, proposed itemised budget), and separate service provider profile should be submitted by the 16:00pm on 19<sup>th</sup> of March 2021.
